

# EKO Token - Whitepaper

## Introduction

EKO is a modern BEP-20 token designed to evolve through stages of supply release and purposeful utility. The token was born with the goal of enabling transparent, fair and community-driven tokenomics.

## Token Information

Token Name: EKO

Symbol: EKO

Standard: BEP-20

Blockchain: Binance Smart Chain

Contract Address: 0x1dC9fA3C9E1A40B556bBFd70D6175ad47eCFB72e

Total Supply: 100,000,000 EKO

Current Circulating Supply: 100,000 EKO

## Token Distribution Plan

- Phase 1: Initial release of 100,000 EKO
- Phase 2: Gradual release of 900,000 EKO in 3 months
- Phase 3: Controlled minting in future development phases
- All remaining tokens will be distributed in waves over time, based on milestones

## Utility and Purpose

EKO aims to support digital creators, handcraft artists, and future e-commerce initiatives. Token holders will have benefits across various platforms related to the EKO ecosystem.

## Technical Characteristics

- Mintable smart contract
- Ownership management
- Verified and published contract on BscScan
- Compatible with MetaMask, Trust Wallet, and other wallets

## Roadmap

- Q2 2025: Launch, smart contract verification, first listings
- Q3 2025: Website and marketplace integration
- Q4 2025: Community expansion and creator incentives
- 2026: Exchange listings and full ecosystem activation

## Conclusion

EKO is built for long-term stability, flexibility, and community value. With transparent development and clear token economics, it is positioned to grow organically across the BNB ecosystem.
